1. OVERVIEW

The development of the "XLN" coin began in 2018 in Canada and since then our main goal has been to develop a fully decentralized market. Thus, users can buy and sell goods with the "XLN" asset, carrying out private transactions if they wish.

Lunarium Blockchain a lows secure end-to-end transactions, through a robust network of servers and a link of masternodes capable of providing security and speed in transactions carried out on its block network.

Lunarium Blockchain will be a decentralized payment mechanism that can be used in various sectors of economic activities, such as: industry, agricultural activities, commercial, financial sectors for settlement, tourism and retail activities in general.

We will develop a Digital Electronic Commerce together with Master Coin partner developers to support a large project supporting Blockchain Networks, Explores, Seeds, Masternodes and Artificial Inte ligence for use in Crypto projects.

We will develop a Digital Electronic Commerce together with Master Coin partner developers to support a large project supporting Blockchain Networks, Explores, Seeds, Masternodes and Artificial Inte ligence for use in Crypto projects.

1.1 LUNARIUM BLOCK CHAIN: PRINCIPLES AND VIEW

The technological advances of recent years have developed so much value in this new global sector of Crypto Assets, creating opportunities in the fnancial market, unlike any other period in history. Humanity is currently in a paradigm that will recreate the way we communicate, do commerce, and have countless other applications due to the adoption of Blockchain technology.

Nowadays, collecting, tracking, analyzing, and using personal data has become an easy task for public and private entities. Corporations and governments collect our data for a myriad of reasons and the result is everyone's privacy loss.

Sometimes we think, "If I haven't done anything wrong, I have nothing to hide," however, that kind of thinking fails to capture the extraordinary impact our collected data have on us. That information can be used for advertising targets, general censorship, retribution boycotts for maintaining views contrary to the status quo.

In fact, we can see in recent history that:

Personal information, including purchasing habits, is used by companies and governments for purposes ranging from advertising to censorship and boycotts and has often been the subject of massive breaches and cybersecurity theft, in part due to the much personal information that is in a centralized location.

Lunarium "XLN" is an alternative for transactions to be safe, fast and with security of information for its users, with sma l fees between its end-to-end transactions and with great growth potential with possible global adoption.

1.2 TECHNICAL SPECIFICATIONS OF THE XLN CURRENCY

Coin Name : Lunarium

Ticker : XLN

Algo : Quark

Coin Type : POS/MN (no POW)
Max Block Size : 1 MB

Minimum Stake Age : 1H

Coin Maturity : 60 confirmations

Max Supply : 1.000.000.000

Port : 13990

Block Time : ~ 60 seconds

Masternode collateral : 250.000 XLN

1.3 BLOCKCHAIN LUNARIUM BLOCK REWARDS DIVISIONS

Lunarium Transaction Details

Every 60 seconds the Lunarium Blockchain rewards its holders who keep their XLN coins frozen on the network, either through Stakes or Masternodes, distributing fixed amounts by blocks according to the policy of rewards that are variable and updated on its GitHub and Official Website; the more coin holders bet on the network, the more rewards they can receive;
2. FUTURE VISION

"Lunarium will make the development of its technologies its "continuous vector for the usability and global adoption of the XLN currency, through trading on its major exchanges, platforms and services developed in a decentralized manner".

3. ROAD MAP

- Launch of the IOS Wallet
- Launch of the Apple Wallet

Q4/2024

- Acquisition of Gems with great potential

Q3/2024

- Listing on DexTrade
- Creation of the Native Web Wallet
- Integration coinpayments

Q2/2024

- Start Lunarium Pay
- Listing on CMC
- Listing MNO

Q1/2024

4.PRINCIPAL CHALLENGES

Be among Coinmarketcap's top global projects;

Be a project that follows the constant evolutions and trends of the cryptography market; and

Promote global adoption of XLN currency with constant development of its Blockchain, Hosting Platform and growing world community.

5. WHERE TO TRADE LUNARIUM(XLN)

https://xeggex.com/market/XLN_USDT

https://financex.trade/trading/xlnusdt

https://bololex.com/trading/?symbol=XLN-USDT

https://exchange-assets.com/en/?market=xln_usdt

https://bitstorage.finance/spot/trading/XLNUSDT

6. WHERE CAN I USE LUNARIUM (XLN)

Pasivin: https://www.pasivin.com/index.php
Mining Power: https://masternodes.miningpower.eu/home
Pecunia: https://pecuniaplatform.io/coin-stats/lunarium

7. ROI CHECK (XLN)
